ENTERIC OUTBREAK INFECTION CONTROL – CHILD CARE FACILITY CHECKLIST

	Start line listing and send every workday by 10 a.m.
	Reinforce handwashing.
	Review basic hygiene principles.
	Inform parents of outbreak status, including new registrants.
	Ensure appropriate signage at all entrances and in strategic locations within the daycare.
	Encourage staff and children to remain in designated areas, when feasible.
	Limit staff movement between daycare sites/sections.
	Isolate symptomatic children until parents can pick them up.
	Exclude ill children and staff until 48 hours after last symptoms.
	Immediately clean, rinse and disinfect surfaces contaminated with feces or vomit.
	Increase routine cleaning and disinfecting, with special attention to commonly touched surfaces such as door handles, handrails, sinks, and toilets.
	 Respect the steps of cleaning and disinfecting: Step 1: Clean with soap and water. Step 2: Rinse with clear water. Step 3: Disinfect respecting the contact time of your product and rinsing recommendation.
	Use gloves during diaper changes and when cleaning up soiled areas (feces or vomit).
	Handle soiled linen and clothing with care.
	Clean toys daily.
	Remove toys that cannot be cleaned and disinfected (such as paper books, stuffed toys, cardboard blocks, etc.).
	Close common sensory bins.
	Cancel culinary activities with the children.
\Box	Canada utings and inform quarte of authreak status
Ш	Cancel outings and inform guests of outbreak status.

NOTE: Additional control measures may be recommended depending on the cause of the outbreak.
